About Me

Software Developer with strong skills in building scalable backend systems, RESTful APIs, and modern frontend applications using React.js. Currently focused on LLMs, RAG pipelines, and Transformer-based AI systems. Passionate about solving real-world problems using modern technologies and delivering impactful, production-ready solutions.

Education

Indian Institute Of Information Technology Allahabad — **Nov 2022 – Jun 2026**
Bachelor of Technology *: Information Technology* — ***CGPA - 8.13 (Till 7th Sem)***

Narayana Junior College, Hyderabad — **2020 – 2022**
Class XII — ***Percentage - 97%***

Experience

Bharat RobotiX | **Software Developer Intern** — **May 2025 – Jul 2025**

- Built and optimized **RESTful APIs** using **Node.js**, **Express.js**, and **MongoDB**, improving data retrieval speed and ensuring secure user management for active users.
- Automated API testing with Postman and added middleware validation, reducing request failures.

HSBC | **Analyst Intern - Financial Engineer** — **Jan 2026 – Current**

- Engineered and enhanced **Propel**, a workforce resource intelligence platform optimizing employee allocation and utilization using backend-driven allocation logic built with **FastAPI** and scalable data processing pipelines.
- Developing a department-specific **AI-powered chatbot** using **RAG**, **LLMs**, and Transformer-based models, implementing optimized embedding strategies, efficient vector storage, and high-precision retrieval pipelines to deliver context-aware and accurate responses.
- Designed and optimized **API architectures** and data workflows to improve resource planning, capacity forecasting, and operational efficiency across cross-functional risk analytics units.
- Contributed to the analytics dashboard frontend using **React** and **TypeScript**, building interactive data visualizations including bar charts and metric dashboards to provide real-time business insights.

Projects

Code-Share-Test | *Node.js, Express.js, React.js, MongoDB, Socket.IO, Judge0 API, Cheerio* |

- Developed an interactive real-time coding platform using **React.js**, **Node.js**, and **Socket.IO**, enabling collaborative code editing **live chat**, and **PDF sharing** across synchronized user sessions.
- Built a live code execution and preview engine with **CodeMirror**, **iframe rendering**, and React Router, allowing users to write and instantly visualize HTML, CSS, and JavaScript outputs within the same interface.
- Engineered a backend testing and execution system using **Express.js**, **MongoDB**, **Cheerio**, **JSDOM**, and **Judge0 API**, featuring automated code validation, multi-language execution, and secure **RESTful APIs** for managing custom test suites.

API Sentry – API Management & Analytics Platform | *Go, Redis, Next.js, TailwindCSS, Chart.js* |

- Implemented an **API management and monitoring platform** enabling secure API consumption through **JWT-based authentication**, Role-Based Access Control (RBAC), and **API key lifecycle management** using **Go (Gin)**, **PostgreSQL**, and **Redis**.
- Designed **scalable backend architecture** (Handler–Service–Repository pattern) and implemented **Redis-backed rate limiting and caching mechanisms** to optimize performance, request throughput, and system reliability in RESTful services.
- Developed a **real-time analytics dashboard** using **Next.js** and **Chart.js**, integrated secure token-based authorization flows, and containerized the full stack with **Docker Compose** for reproducible and scalable deployment.

Technical Skills

Languages: C/C++, Java, Go, Python, JavaScript, TypeScript, SQL
Frameworks & Technologies: React Js, Next Js, Spring Boot, Node Js, Express Js, FastAPI, Tailwind CSS, REST APIs, Redis, Machine Learning, RAG, Embeddings, Transformers
Databases & Tools: MongoDB, PostgreSQL, Git, Postman, Docker, Kubernetes

Achievements

- Ranked among the **Top 5 contributors** in **Opencode**, an open-source initiative by **Geekhaven - IIIT Allahabad**.
- Member of **Google Developer Student Clubs** at IIIT Allahabad, fostering innovation and collaboration in tech.
- Secured **Global Rank 181** among 20,000+ participants in the **Amazon Hackon**, demonstrating problem-solving skills.
- Achieved **Rank 662** in **Codeforces Round 1058 (Div. 2)** and currently hold the **Expert** title on **Codeforces**.

Coding-Profiles

- **Codeforces** (Expert, Max Rating: 1624) **LeetCode** (Knight, Max Rating: 1980) **CodeChef** (4, Max Rating: 1864)
